## Reducing Casualties by Stopping Crashes

## INFORMATION

### IMPLICATIONS OF COVID 19

The Graham Feest Consultancy is satisfied with the actions which have been taken by the venue to ensure everyone's safety as far as is practicable. It is incumbent upon all those attending to follow the instructions which will be set out in the joining details and if necessary as subsequently amended on the day. As a result of ensuring appropriate social distancing and compliance with any national regulations the numbers attending this event will be restricted as dictated by the venue's management and in line with national guidelines.

### REDUCING CASUALTIES BY STOPPING CRASHES

It is a given that road users do make mistakes and we must take mitigating action to reduce the severity of death and injury and to look much closer at how we can do more to prevent the errors in the first place.

However death and injury is an outcome of a crash having occurred and so logically it follows that no one would have suffered if the crash had not happened.

The emphasis of our work is primarily and traditionally based on statistical information, science and evidence. A location or stretch of road where there has been a number of recorded injury crashes is more likely to get reviewed than another where there has been as many crashes but they are just not recorded as no one was hurt. It follows therefore that if we are to make progress in reducing casualties we need to stop the crashes occurring.

### WHO SHOULD ATTEND

Reducing Casualties by Stopping Crashes is for any person who is involved in the practice and promotion of road safety in terms of casualty reduction, reducing the risk to road users and making the environment smarter.

It will be of special interest to those in the areas of Education, Training, Enforcement, Engineering, Collision Investigation, Fleet, logistics and Transport Management and Road Safety Audit etc as well as those who have managerial responsibility for a workforce who drive for their business and will appeal to those working in the private, commercial, statutory and voluntary sectors. It will also be valuable for thoughts that lead within the community and people who have a Health and Safety or Personnel/Human Resources responsibility.

Through a series of presentations, interactive sessions and discussions we will explore interventions designed to stop people becoming involved in traffic incidents which inevitably leads to unplanned and devastating outcomes.

### CPD CERTIFICATION

Accredited Provider for SoRSA.

Recognised and valued as CPD by

A Certificate of Attendance will be issued at the end of the day to support all CPD requirements.

### COSTS

The event cost is £135.00 to include all refreshments and lunch.
